Experience

Starting my career in traditional design in 2000, I quickly developed a passion for digital methods, leading to a degree in Digital Media. My journey in a fast-paced creative agency honed my design, media, and development skills, and continued to enhance my technical knowledge, exploring web and game development.

In 2014, I joined Bronze Labs, where I applied my creative and technical expertise to high-impact military, government, and global projects. My work in innovation, AI and mixed reality earned me the prestigious Formula 1® Innovation Prize, which led to collaborations with Formula 1® as an external technology consultant.

Today, as Product Owner at Bronze Labs, I design, develop, and lead teams in creating cutting-edge platforms. I am passionate about leveraging technology to solve real-world problems, always seeking innovative solutions and new opportunities.

Standout Moment

Winning the Formula 1® Innovation Prize – A global crowd-sourced initiative with 300,000 entries, where I developed a solution to boost fan engagement in Formula 1.

We believe Jamie's solution has the capability to change the sport "forever" by offering an unprecedented level of fan engagement.

Ross Brawn, Formula One Management

Jamie's solution was my favourite because it lets both die-hard fans and those who might be new to the sport make sense of it all and really immerse themselves in the action.

Lewis Hamilton, 8 time Formula 1 World Champion

Get to Know Me

My name is Jamie Gough, born in June 1984. I’m based in Telford, Shropshire with my wife Emma, and son Robbie. I have a full UK driving licence and able to travel. I enjoy technology, photography, gaming, motorsport, DIY, snooker, and exploration. I don’t hold any religious beliefs nor strong political views. I don’t smoke, occasionally like a drink. I’m easy going, love a laugh, can juggle, acted on TV in my youth, and bake fantastic cake creations. I am a cancer beater, battling twice in my 20s, now living a life full of health and happiness.
